

Hello Team!

I spoke with Cliff Brown today and he showed me how to setup the Mac for printing.

The following are the steps for setting up the printer:

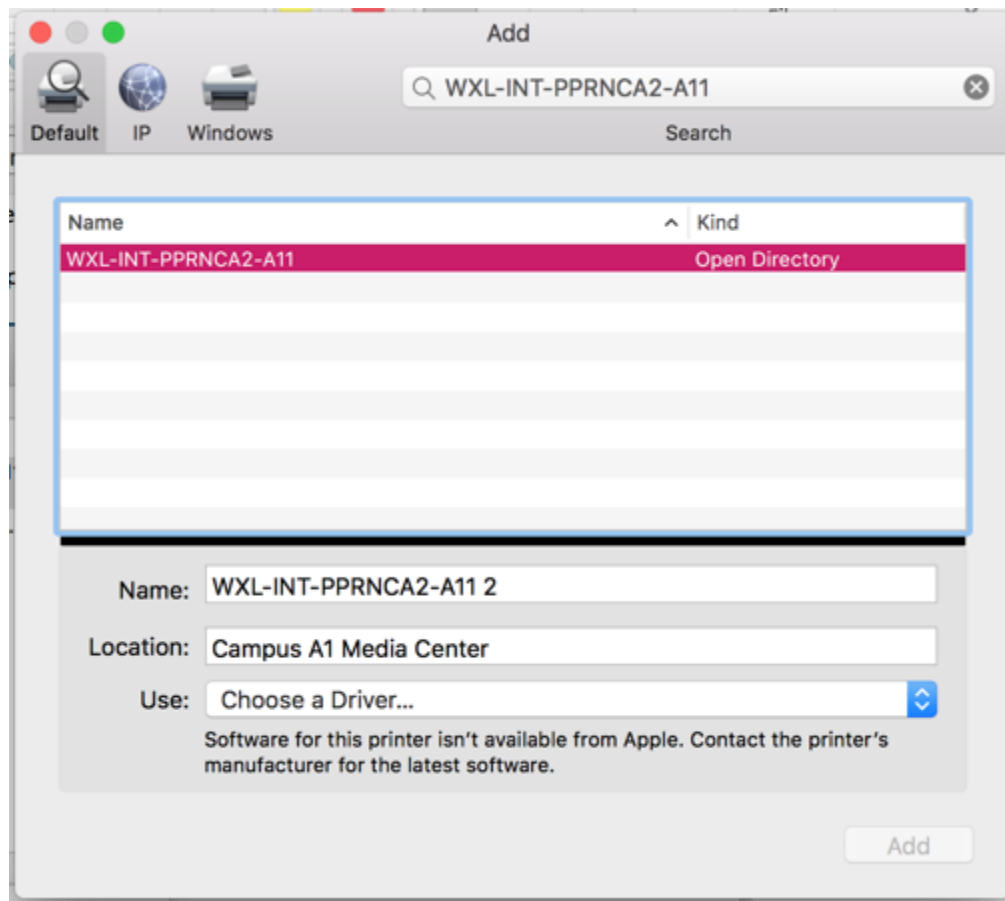

Step 1: Go to Printers and Scanners in your system preferences (the Apple icon)

Step 2: Click the + button to add a printer

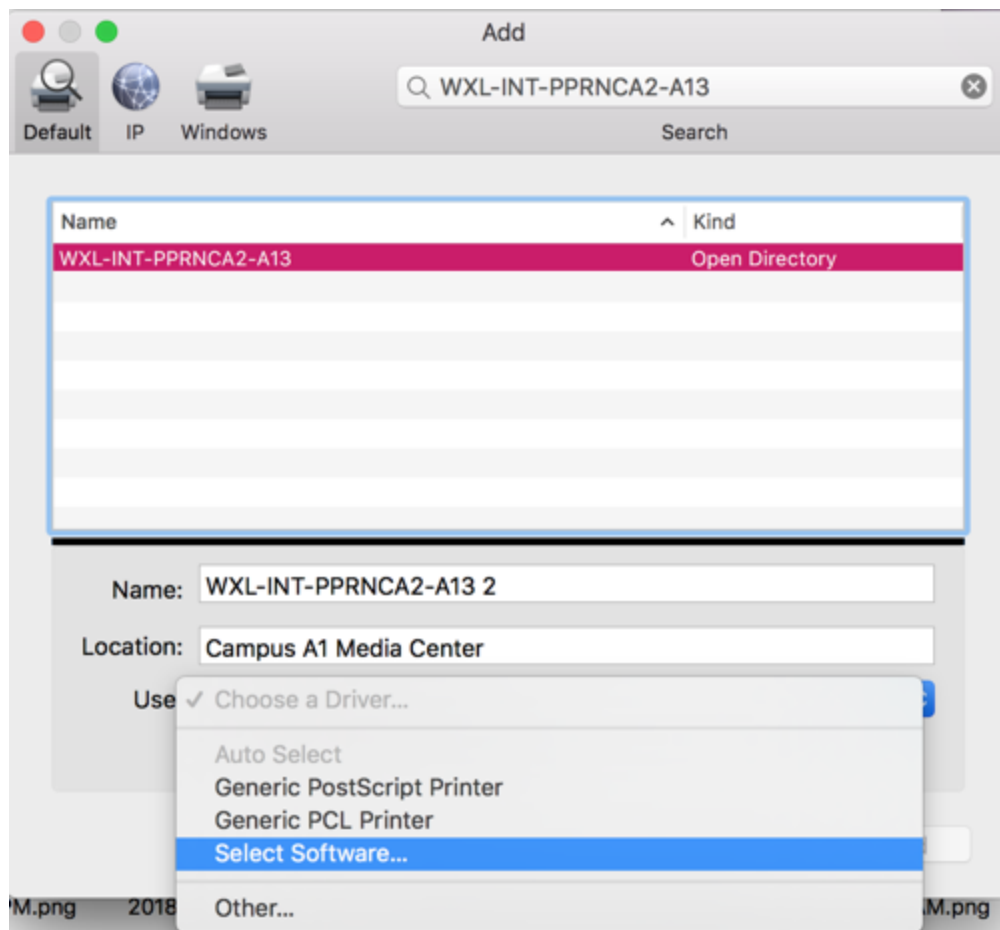

Step 3: Click Add Printer or Scanner... (the first line after clicking the +)

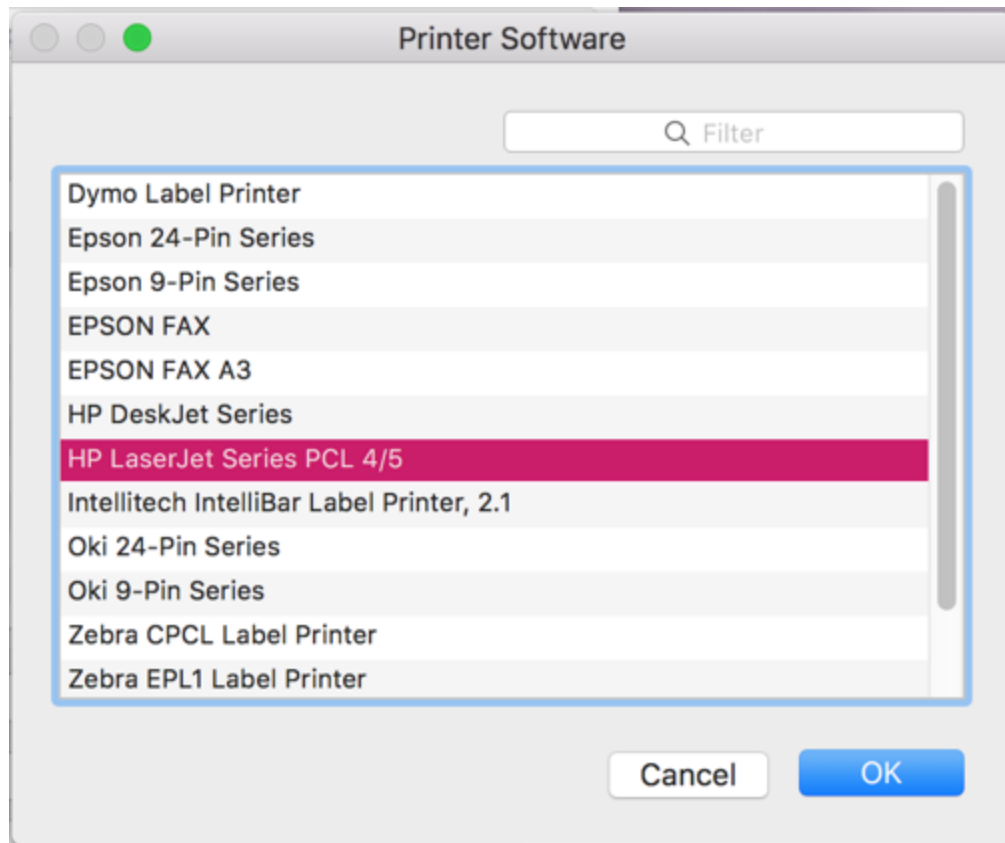

Step 4: In the top search bar paste the following: WXL-INT-PPRNCA2-A11 and then click the resulting printer

Step 5: Go to the Use drop box (bottom of the above screen) and choose select software.

Step 6: Choose HP Laser Jet Series PCL 4/5 and click OK

Step 7: Click Add at the bottom of the screen

Step 8: Repeat this process from the beginning, except on step 4 substitute the printer for WXL-INT-PPRNCA2-A13
