```
<property>
 <name>hive.server2.enable.doAs</name>
 <value>true</value>
</property>
```

Also if you want user ABC to impersonate all(*), add below properties to your core-site.xml

```
<property>
   <name>hadoop.proxyuser.ABC.groups</name>
<value>*</value>
</property>

<property>
 <name>hadoop.proxyuser.ABC.hosts</name>
 <value>*</value>
</property>
```
