Tablet

Describes output for a tablet.

The `maprcli fid dump` output for a tablet includes key and value pairs for the following:

- **startkey.** The first key value in the tablet.
- **pmap.** Each partition.
- **endkey.** The last key value in the tablet.

Output Fields for a Tablet

This table describes a majority of the output values for each partition (pmap) in the tablet.

Field	Description
key	The partition key.
segfid	The FID of the segment map associated with this partition.
isFrozen	A Boolean value that indicates if a partition is in a frozen state or not. Internally, a partition is sometimes temporarily marked as frozen in order for certain operations to complete.
inSplit	A Boolean value that indicates if a partition split is in progress for this partition.
useBucketDesc	This property is for internal use only.
lastFlushedBucketFid	The FID of the bucket file (WAL) which was last flushed for this partition.
numLogicalBlocks	The number of logical blocks (8K) for this partition.
numPhysicalBLocks	The number of physical blocks (8K) for this partition.
numRows	The number of rows stored in this partition.
numRowsWithDelete	The number of rows which are marked for delete in this partition.
numRemoteBlocks	The number of disk blocks which are not local to this partition. When a region splits, a partition moves from one node to another and it is possible to temporarily have some remote blocks.
numSpills	The number of spills.
numSegments	The number of segments.

Output Example for a Tablet

```
maprcli fid dump -fid 2116.59.131462 -json
{
    "timestamp":1425579636931,
    "timeofday":"2015-03-05 06:20:36.931 GMT+0000",
    "status":"OK",
    "total":6,
    "data":[
        {
            "key":"endkey.user31557817420517147178",
            "value":{

            }
        },
        {
            "key":"pmap.",
            "value":{
                "segfid":"<parentCID>.1065.133486",
                "isFrozen":false,
                "inSplit":false,
                "useBucketDesc":true,
                "lastFlushedBucketFid":"2116.901.133158",
                "numLogicalBlocks":34921,
                "numPhysicalBlocks":21976,
                "numRows":9332,
                "numRowsWithDelete":0,
                "numRemoteBlocks":0,
                "numSpills":137,
                "numSegments":74
            }
        },
        {
            "key":"pmap.user15231862745325278170",
            "value":{
```

Note: The postSpitCopy key and value are for internal use only.
